Proposed Compliance Liaison:

Statement of Compliance to the Code

I have read the ARF Code of Conduct and Memorandum of Implementation and have shared it with those in my organization who are responsible for privacy and business ethics. I understand that some features of the code are strict requirement for compliance. These are features where stated an organization “must” comply. There are also features of the code where an organization “should” comply where possible.

I understand that the Compliance Liaison must submit a short annual report stating they are in compliance with the code. I also understand that The ARF staff may request a short initial interview with the Compliance Liaison to understand how the company or organization has made commitments to the key principles of the Code. These include: Honesty, Integrity, Transparency and The Chain of Trust Principle.
